Andie

Huge thanks and we agree that should put them on the right track and they understand the seriousness of the issue.... The rest is business issues like short shipments etc.

I also moved to a new supplier and have nomore issues with Kingdoes.

Regards and again thank for the professional service

Johan

Kind Regards

Dear Johan,

Please see attached the report provided by Beijing Kingdoes RFID Technologies Co. Ltd, as a response to ICAR's official request for clarifications and corrective actions. We would appreciate it if you could kindly review and let us know if you have any questions. From our point of view, since there is no pending issue anymore ICAR is willing to file the case.

We look forward to hearing from you.

Best regards,

Andie
