- Can ICAR share the results of original test with other lab? Check what contract template says. (re 10.9.5 Laboratory line). Need to avoid the situation where the mfr does not allow original results to be shared. Based on this, check 10.9.6 – point 3. Umbrella contract reads:

7.2 All of the test results, analyses and reports are the full and absolute property of the Client.

8.2 The Service Supplier, (), assumes the responsibility to maintain confidentiality with regard to the data and processed information that comes into its possession during the performance of their service, and agrees not to disclose it nor subject it to exploitation. All of the information, data, knowledge, technical experience and diagrams provided by the Service Supplier in the test report are considered confidential.
