Overview: data collection for beef on dairy

Wednesday 22 May 2024
Joint ICAR – Interbull Session

Jo Newton
2022/23 BWYPEX Recipient
Research Scientist Agriculture Victoria

Matthew Shaffer
Interbull Steering Committee Chair
CEO DataGene Ltd.

Beef from dairy: a dairy origin animal entering the beef supply chain

Beef from dairy: a dairy origin animal entering the beef supply chain

Win-win-win?

Sustainable pathway
for all calves

Higher value calves

New markets for beef
genetics

Lower carbon footprint
Year-round supply

Data for a global snapshot?

Fragmented....

1 year \neq 1 year

Data for a global snapshot?

Figure. Trends in semen usage in dairy herds around the world using semen sales data

Data source: AHDB 2023; ANAFIBU 2023; ANAPRI 2023; Institut de l'Elevage 2023; Lactanet Canada 2023; NAAB 2013 – 2022; NHIA 2013 – 2022; ICBF 2023; Växa Sverige 2016 – 2023; Viking Genetics 2023.

beef conv. dairy sexed dairy all dairy

Figure. Trends in semen usage in dairy herds around the world using semen sales and insemination data.

beef conv. dairy sexed dairy all dairy

Figure. Trends in semen usage in dairy herds around the world using semen sales and insemination data.

Where a breakdown of conventional and sexed dairy semen usage is not available a combined value is shown (all dairy).

Adoption rate varies across countries

Figure. Total semen sales into both dairy and beef herds

Data source: NHIA 2014 – 2023, NAAB 2014 – 2023

Figure. Total semen sales into both dairy and beef herds and sexed dairy semen sales as a proportion of dairy semen sales.

Data source: NHIA 2014 – 2023, NAAB 2014 – 2023

Total semen sales into dairy and beef herds

beef all dairy

Sexed semen as% of dairy semen sales

sexed dairy

Key findings & recommendations delivered in 2023.

Successful beef on dairy integration

“Wicked
problem”

- Multifaceted
- Collaboration across industries
- Collaboration across disciplines

OFFICIAL

Successful beef on dairy integration

“Wicked
problem”

Genetics one of
the pieces

- Identify bulls whose progeny will perform in the beef supply chain
- Support mating decisions on-farm
- Informed calf purchasing
- Improve profitability of beef from dairy

Successful beef on dairy integration

“Wicked”
problem

Genetics one of
the pieces

Data a key barrier

Successful beef on dairy integration

Data a key barrier

- Few combined beef & dairy databases
- Calving traits for beef on dairy
- Dairy-beef progeny performance
 - carcass traits
 - efficiency traits

Monitor trends:

semen usage, genetic
trends...

Validation:

understand how existing
(genetic) tools perform

Develop:

New tools for local markets

Prioritise establishing data collection pipelines
& collecting data on dairy-beef progeny
