

APTAR CSP Technologies

Aurélie Kientz and François Bidet

Niederbronn-les-Bains (Strasbourg area), France,

| Background

Apar CSP Technologies is an injection moulding company which is specialized for the production of airtight, leak-proof and clean containers for the Dairy, Food and Pharmaceutical sectors. In the 80's, Aptar CSP Technologies developed a flip-top vial that is easy to open and close. This vial continues to be the vial of choice for milk sample collection and dairy laboratory automation. We offer comprehensive goods and services for custom engineered milk sampling solutions. With our partners in automation and RFID, we can fulfil your exact requirements on vial traceability, vial handling and laboratory automation. Aptar CSP Technologies a unique partner for the global dairy industry.

| Expertise
