

# Group Discussions.

- How do we demonstrate the benefits of Interbeef?
- How could we make it easier for a new country to join?
- What are the business model/technical challenges for international genomic evaluations in the future?

# Interbeef workshop 2019

## How do we demonstrate the benefits of Interbeef ?

- need to « market » Interbeef not only for international ranking but also for other important services
  - pedigree validation
  - knowledge on national genetic evaluation (need of ICAR Interbeef and GE form update)
- Need of communication materials on Interbeef community and Interbeef process (simpler than Code of Practice)

IDF/ISO 2019 **21 - 25** June

# Interbeef workshop 2019

## How could we make it easier for a new country to join?

- define a contact at Interbull Center to exchange on steps
- develop at Interbull Center a test environment for new countries to have a « look & see » Interbeef test
- map the connectedness of the new country with the others
- find external funding for Interbeef research
- need to make visioconference available at each Interbeef meeting
- need each participating country to describe how the use Interbeef results

# Interbeef workshop 2019

## General remarks:

- need of other information on AI bull information: status, list of countries of use, link to semen provider
- interbeef interests underlined:
  - new traits
  - collaboration on genomic and complex traits
  - genetic defects
  - integration of Interbeef results into national evaluation
