Table of contents

Opening
Opening speech by the President .................................................................................................................. 3
The President’s report on the activities of ICAR since the last session ...................................................... 5
J. Crettenand

Technical Session 1: Keynote Presentations
Cattle breeding in Switzerland ...................................................................................................................... 13
Summary of Markus Zemp’s speech
Classical performance recording and marker selection .............................................................................. 19
K.A. Weigel
Performance recording in developing countries: an overview ................................................................. 25
K.R. Trivedi
Performance recording: different strategies and breeders’ needs ............................................................... 41
D.A. Funk
Does breeding for high milk yield mean breeding for more health problems .............................................. 47
B. Heringstad, G. Klemetsdal & T. Steine

Parallel Technical Session 2.1: Use of Data from Permanent Milk Recording and
Automatic Milking Systems for Official Performance Recording
Milk recording and automatic milking systems: simplification
by reducing the daily time test from 24 to 12 hours .................................................................................. 57
N. Bouloc, V. Dervishi & J. Delacroix
Methods to estimate 24-hour yields for milk, fat
and protein in robotic milking herds ........................................................................................................... 65
D. Lazenby, E. Bohlsen, K. J. Hand, D.F. Kelton,
F. Miglior & K.D. Lissemore
Electronic dataflow between a dairy farm and the
central recording system. Practical experience in using data
from milk meters (standard and robot) for milk recording ........................................................................ 73
H.J. Van der Beek
Milk recording in herds with daily milk measurement
and/or robotic milking: The Finnish solution ............................................................................................. 79
J. Kyntäjä & S. Tommila
Experiences in carrying out milk recording with milking robots (AMS) ........................................ 83

H. Jürgens

Transformation of AMS records to 24-hour equivalents ............................................................. 87

A. Buenger, T. Pasman, E. Bohlsen & F. Reinhardt

Parallel Technical Session 2.2: National Animal Tracing Database and Their Use for Breeding Purposes

Utilisation of the French national animal tracing system by breeder organisations ......................... 97

E. Rehben, L. Marguin & B. Piednoir

Swiss Animal Tracing Database: Set-up, experiences and objectives for the future .................. 101

F. Schmitz-Hsu

National animal tracing databases and their use for breeding purposes ..................................... 105

D. Evans

Übernahme von Meldedaten (VVVO) in die Milchleistungsprüfung ........................................ 107

K. Kuwan & E. Bohlsen

Tissue Database: The basis for tracing of origin ............................................................................. 113

R. Porzig

Tissue bank: A basis for future breeding strategies ........................................................................ 117

C.-St. Schäfer, K.-U. Götz & R. Reents

Parallel Technical Session 3.1: Performance Recording of Beef Traits

Use of commercial slaughterhouse data in beef cattle breeding .............................................. 123

C. Stricker, M. Berweger, Y. Schleppi & R. Schwager-Suter

Prospects for an international beef breeds genetic evaluation system and the implications for ICAR. A view from users ................................................................. 131

J.-N. Bonnet

The ICAR questionnaire for beef recording. Statistics and trends ............................................. 135

L. Journaux, H. J. Schild & A. Grogan

First experiences with an across country genetic evaluation system for beef cattle .................. 139

A. Reverter, D.J. Johnston & H.-U. Graser

Heteroskedasticity and genotype by environment interaction across European countries for weaning weight in Charolais breed ....................................................... 147

R. Quintanilla, D. Laloë & G. Renand

New developments in beef recording (and its possible benefits) ............................................. 151

J. van der Westhuizen, L Bergh & A. Grogan
Parallel Technical Session 3.2: Recording of Functional Traits: State of the Art and Alternatives Systems

Recording disease and reproductive events in dairy cattle for developing national health and fertility selection indices .......................................................... 157
H.N. Kadarmideen

IT Solutions for disease surveillance and management in New Zealand ........................................... 163
D. Hayes & M. Jeffries

Standards of recording management, health and fertility information .............................................. 171
R.J. Esslemont & M.A. Kossaibati

PocketDairy: Dairy herd management software for the palm computer ........................................ 185

Organisation of recording and control of data used in France to evaluate calving ease and birth weight in dairy and beef cattle .................................... 189
L. Journaux, H. Ledos, M. Mathevon, S. Mattalia & O. Leudet

Associations between milkability and udder health on the basis of LactoCorder-data from milk recorded farms in Bavaria ......................................... 193
J. Duda

Technical Session 4: Presentation of ICAR Sub-Committees, Task Force and Working Groups

ICAR Sub-Committees, Task Force and Working Groups ............................................................. 199
A. Rosati

Report of the Sub-Committee on Animal Identification ................................................................. 209
R. Pauw

Animal Recording Data Working Group ..................................................................................... 217
F. Armitage

Report of the ICAR Sub-Committee on Milk Meters and Jars .................................................... 221
A. Rosati

F. Miglior, S. de Roos, Z. Liu, M. Mathevon, A. Rosati, L.R. Schaeffer & P. VanRaden

ICAR Working Group on Milk Testing Laboratories.
Biennial report of activities in 2000-2001 .................................................................................. 233
O. Leray

Report of the Chairperson of the ICAR Conformation Working Group ....................................... 239
D. Hewitt
  Report of activities from May 2000 to May 2002 ......................................................... 241
  Ab F. Groen

Report on activities of the ICAR Working Group on Beef Recording ........................................ 243
  H.J. Schild

Interbull Report for 2000 and 2001 .......................................................................................... 253
  J.C Mocquot, U. Emanuelson & J.Philipsson

ICAR Working Group on AI and other relevant technologies. Summary Report 2002 ............... 263
  A. Malafosse

ICAR recommendations for quality assurance in recording and evaluation ................................. 267
  J. Juga

Report of the Task Force on Development Fund ....................................................................... 271
  K.R. Trivedi

Report of the Working Group on Milk Recording of Sheep ........................................................ 273
  J.M. Astruc, F. Barillet, M. Fioretti, D. Gabiña, E. Gootwine,
  A.P. Mavrogenis, F.J. Romberg, S.R. Sanna & E. Stefanake

ICAR Working Group on Sheep Meat, Fibre and Fertility ....................................................... 289
  R. Banks

Report of Working Group on Milk Recording in Goats ............................................................... 297
  D. Kompan

Report of the Working Group on Milk Performance Recording of Buffalo .................................... 307
  B. Moioli & M. Sajjad Khan

  Technical Session 5: Mixed Session with Emphasis on New Technologies

On-line milk component sensing ................................................................................................. 321
  R. Claycomb, G. Mein, D. Whyte & A. Wilson

Experiments in automatic ovulation prediction in dairy cows ................................................... 327
  T. Mottram & M. Velasco-Garcia

Implications of electronic cattle identification for milk recording in Australia ............................ 333
  P.J. Bailey, R. Poole & A.G. Britt

Dairymetrics – A web-based dairy records benchmarking
  tool for centrally processed DHIA herds .................................................................................. 337
  D.W. Webb, C.N. Vierhout & J.S. Clay

Robotic solutions for DHI laboratories ...................................................................................... 343
  D. Johnston
Aspects of Analytical Quality Assurance (AQA) related to on-farm testing of milk components in DHI-schemes .......................................................... 351

Carcass video imaging – A new tool for beef recording .......................................................... 357
H.J. Schild, M. Brka & I. Medjugorac
