

AUSTRALIAN REPORT

PRESENTED BY: DR. ARTHUR RICKARDS OAM
BUSINESS DEVELOPMENT CONSULTANT

Australian Cattle Population

50% of Cattle
with *Bos indicus*
blood

~
30 Million
Head

Tropic of Capricorn

50% of Cattle
with *Bos taurus*
blood

Where Output Goes

700,000* Live Cattle Exports

736,000 tonnes CWT Local Consumption **(35%)**

1,366,850 tonnes CWT Export Beef **(65%)**

* *115,000 exported for breeding*

585,000 exported for value adding & slaughter

Breed Distribution of Seedstock Herd

**Annual
Registration
190,000**

Australian Agricultural Company

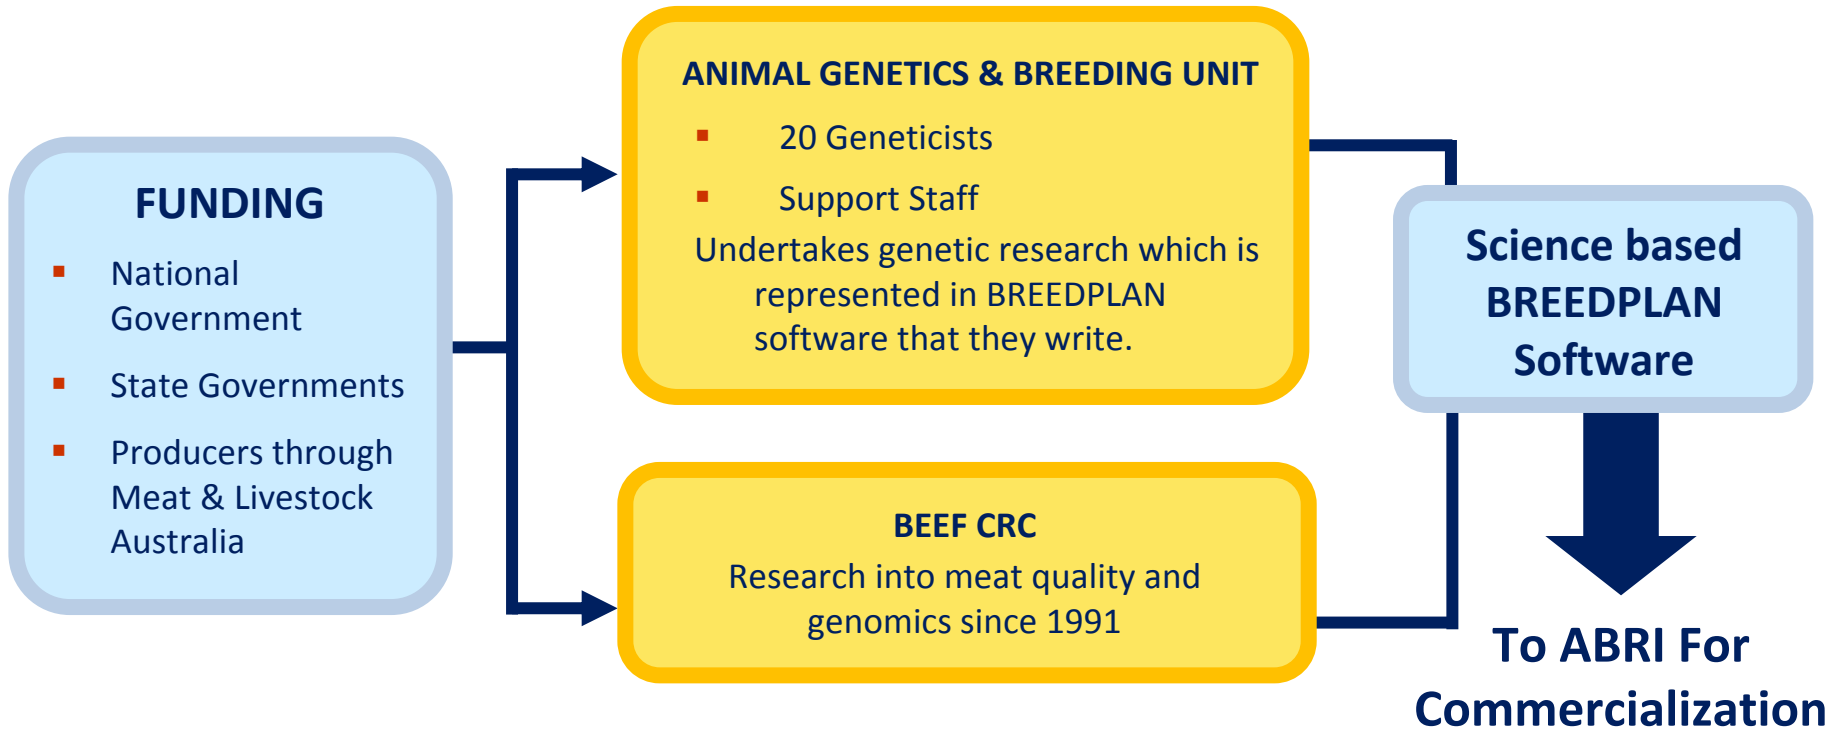

No. of Properties	23
Feedlots	5
Area	7.2M hectares (Almost the same size as Ireland)
No. of Cattle	660,000 hd
Breeds:	
Wagyu	60,000
Angus	65,000
Gulf Composite	105,000
Barkly Composite	160,000
Brahman Composite	270,000
TOTAL	660,000

BREEDPLAN® Genetic Evaluation

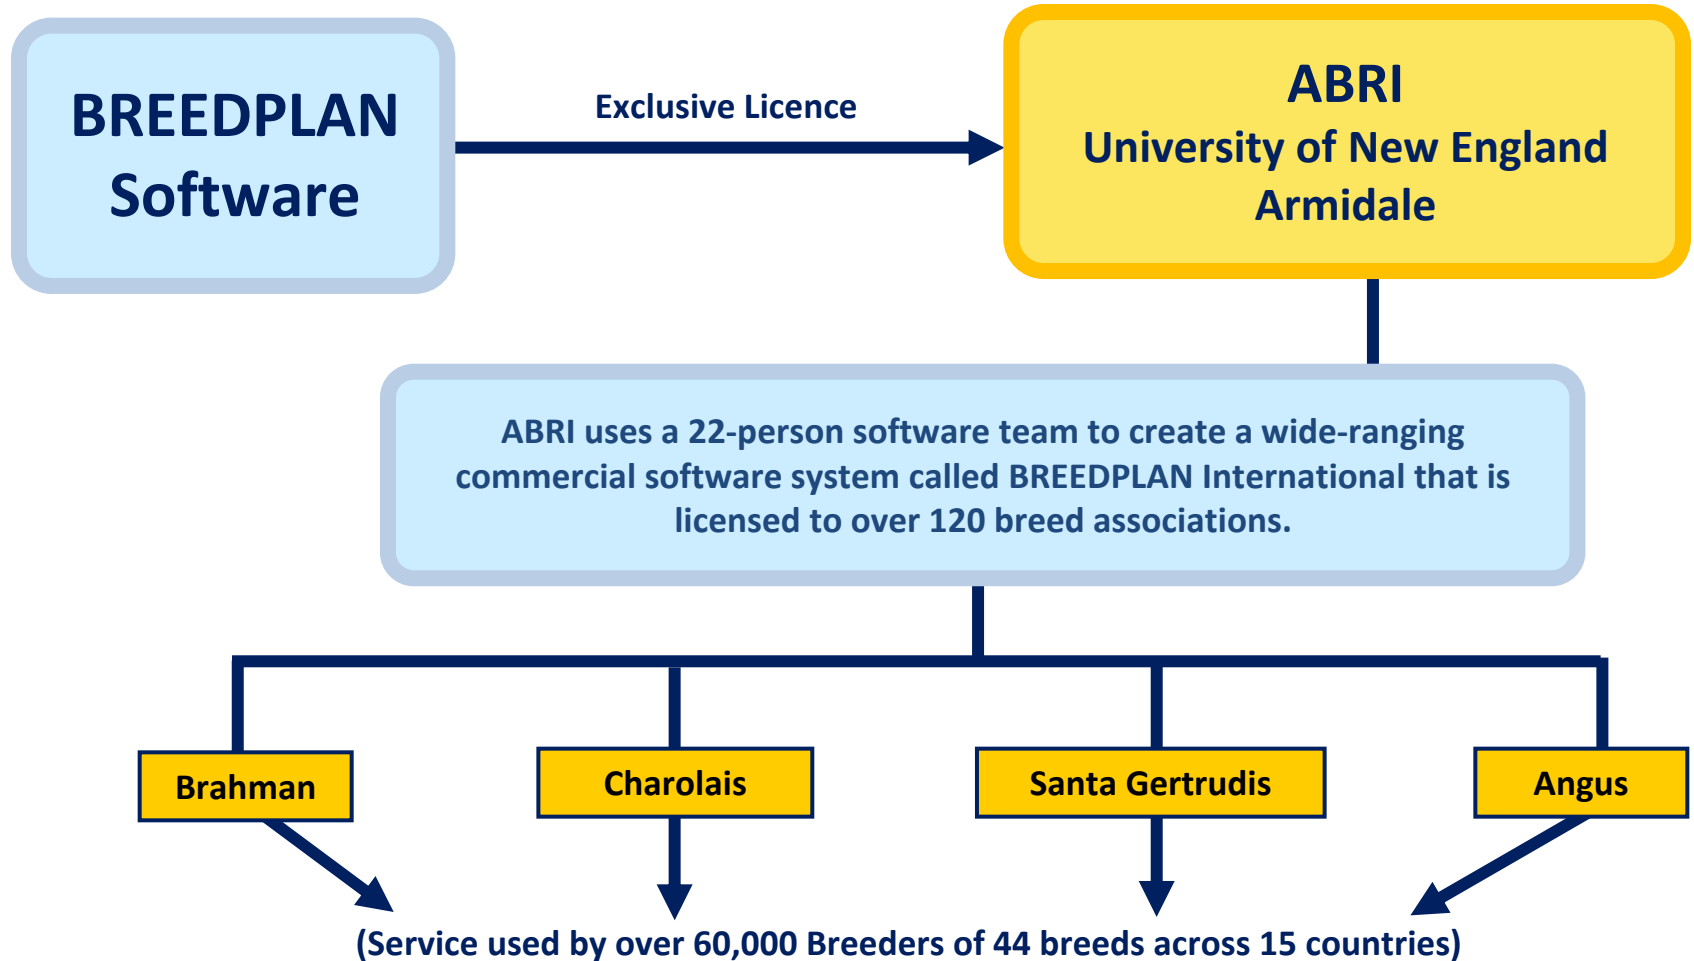

- BREEDPLAN® is the world's most widely used genetic evaluation system for beef cattle
- Developed in Australia
- Used by:
 - 44 breeds
 - 100+ breed associations
 - across 15 countries
- Growth, carcass and fertility EBVs are evaluated together in a multi trait model + calving ease + others
- Database over 40 million animals

BREEDPLAN® Research Component

Commercialization Model

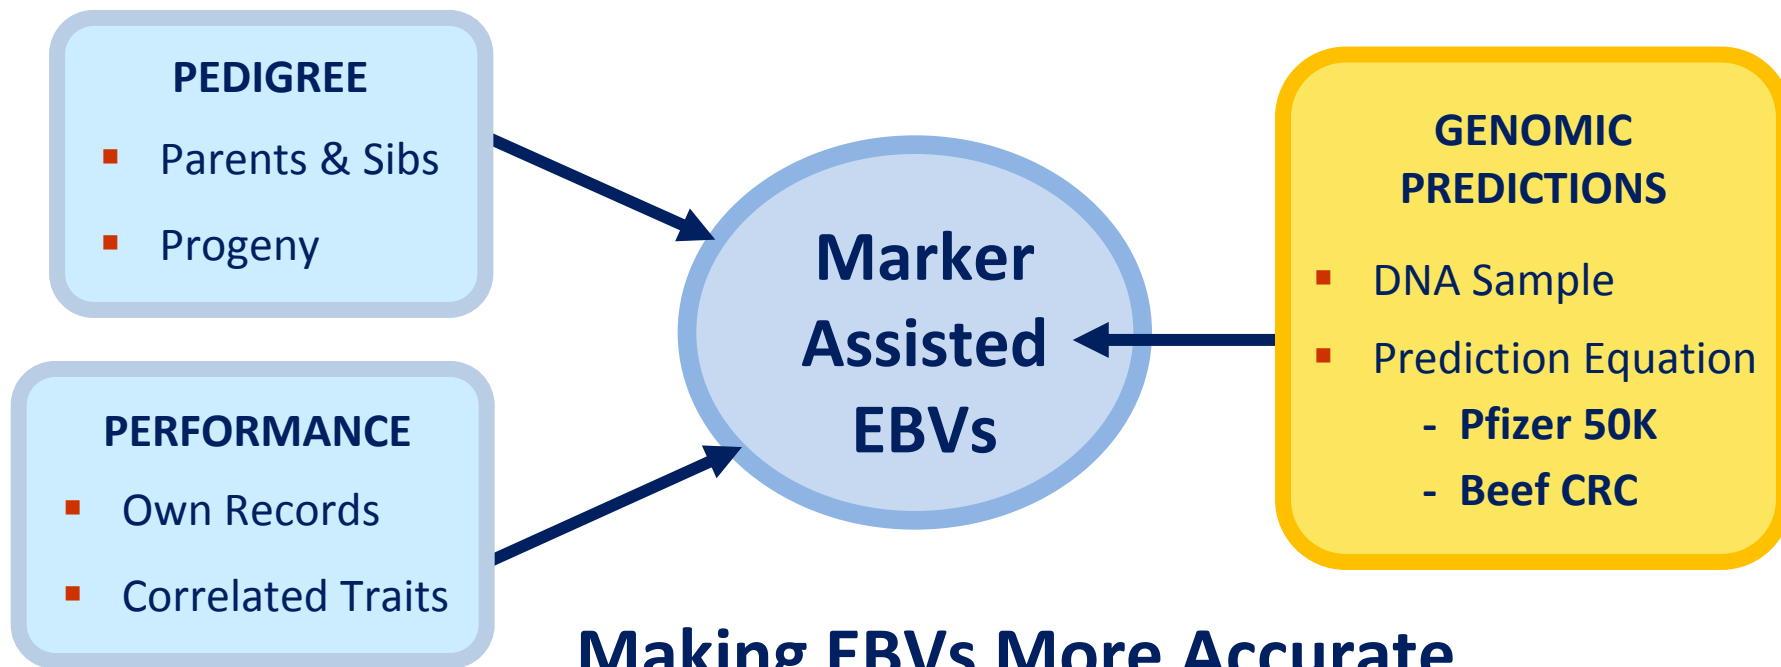

Traits For Which BREEDPLAN EBVs/EPDs Are Produced

Growth	Fertility/Birth	Carcase	Other
Birth Weight Growth: <ul style="list-style-type: none"> ▪ 200 Day ▪ 400 Day ▪ 600 Day Maternal (Milk) Mature Cow Weight	Scrotal Size Days to Calving Gestation Length Calving Ease <ul style="list-style-type: none"> ▪ Direct ▪ Daughters 	Carcase Weight Eye Muscle Area Fat Depth: <ul style="list-style-type: none"> ▪ Rump ▪ Rib Intramuscular Fat Retail Beef Yield	Docility Net Feed Intake Flight Time Shear Force Structural Soundness

BREEDPLAN Is Producing Marker-Assisted EBVs

Routine Across-Country Evaluations

Analyses are run on combined datasets

- Australia and New Zealand*
- South Africa and Namibia
- Pan American Hereford - USA, Canada, Uruguay and Argentina
- Murray Grey - Australia, NZ, USA, Canada and UK

**Comparable EBVs/EPDs to identify and more
Readily use the elite genetics**

** Commenced in 1990*

Suite of Genetic Improvement Tools

A number of
complementary
decision making tools
can be interfaced with
BREEDPLAN

- **BreedObject**
- **TakeStock**
- **MateSel**
- **Quality assurance products**
- **GeneProb**
- **Internet Solutions**

BreedObject

A selection index tool for formalising breeding objectives to assist in breeding more profitable animals

Creates a Selection Index to maximise PROFIT

- Evaluates the **genetic progress** of a herd for a particular Selection Index
- **Benchmarks the progress** of the herd against the breed
- Identifies **Key Performance Indicators (KPIs)** that explain significant differences in the rate of genetic progress between herds

Genetic Benchmarking Tool

- **Mating selection tool**
- **Optimise genetic progress** with constraints -
 - candidate animals
 - breeding technology (AI/ET)
 - genetics (EBVs & MVPs)
 - inbreeding
 - genetic conditions

Quality Assurance Products

- **Data Audit**

evaluates data quantity and quality

- **Completeness of Performance**

- Provides information on data submitted to BREEDPLAN
- Two components:
 - Completeness of Performance Reports
 - Star Rating System

GeneProb

- calculates probability of animal being a carrier for a particular genetic condition based on DNA plus pedigree
 - Genetic disorders
 - Horn/poll
 - Coat colour

Internet Solutions

Internet information system that provides access to:

- **Animal/Member Enquiries**
 - Animal lists (with sort criteria)
 - Pedigree display with photos/images
 - Performance information
 - Progeny lists
 - Graphs of performance
 - Membership details
- **Entry of registrations/inventory updates/performance data**
- **Mating prediction service**
- **Download electronic files/reports**

3 Million Pages Per Month

Services Include

- On-Farm visits
- Workshops
- Field Days
- Webinars
- Newsletters
- Technical Tip Sheets
- Consultation to Breed Association Boards & Technical Committees
- Training Breed Association Staff
- Industry interface with research groups

Technical Support

Cofunded by:

ABRI

Breed Associations

Meat & Livestock Australia

Conducting Genetic Evaluations in 15 Countries

BREEDPLAN International Summary

- Used by 100+ breed associations
- 44 breeds
- 15 countries serviced
- 60,000 users
- 460,000 beef registrations per year
- EBVs/EPDs produced on 22 traits
- Does across-country evaluations routinely
- Internet information system - 3 million pages per month
- DNA data included in marker-assisted EBVs
- Total database exceeds 40 million pedigree cattle
- R&D budget A\$12M - \$20M pa in period 2001 - 2011
