

Welcome

2011 ICAR Workshop

Jay Mattison CEO, National DHIA
Quality Certification Services
Vice President ICAR

Hard to get cows in the sky -

- Look at the big picture
- From 10,000 meters
- From my 1 meter (or liter)
- The local organizers work hard
- The work is appreciated by ICAR and participants

Here to listen and ask questions

- Exchange of ideas and information
- Make some suggestions
- Have a program that serves the needs
- Farmers are the customer
- Consumers are the customer of farmer

A unit of semen is really –

Data

In a plastic straw

Decisions are still –

Data Driven

Data are still-

From the
COW!

Having the available DATA:

- Puts farmer in the “knowledge loop”

Allows “Data Driven Decisions”

Thank you
