Irish Model - data, recording, genetic evaluation & information services

Irish Model - research, innovation and service development.

International Considerations

We support:

ICAR Standards & Guidelines

In order to get:

Data from other countries we can trust

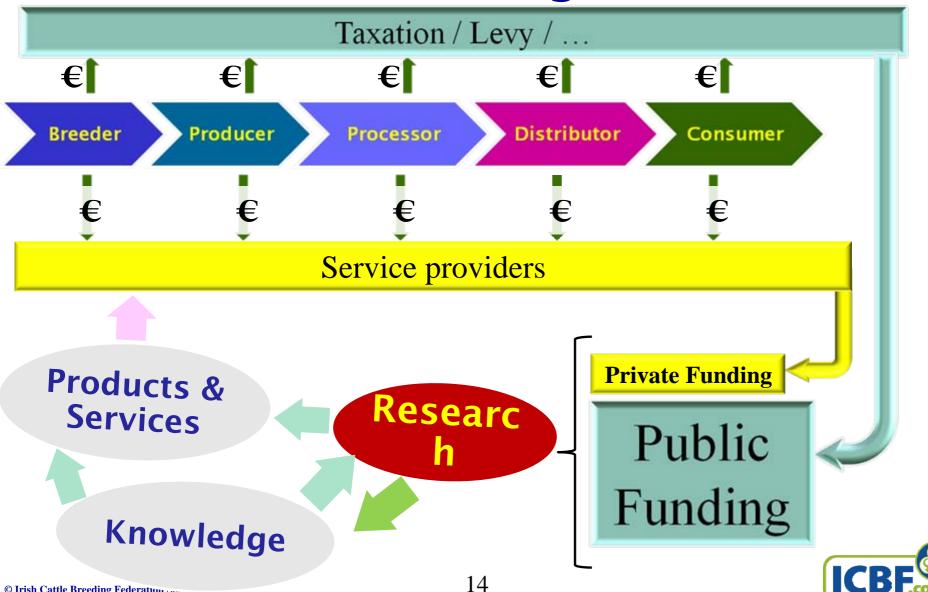

Interbull (dairy) & Interbeef (beef)

Genetic evaluations from other countries we can trust

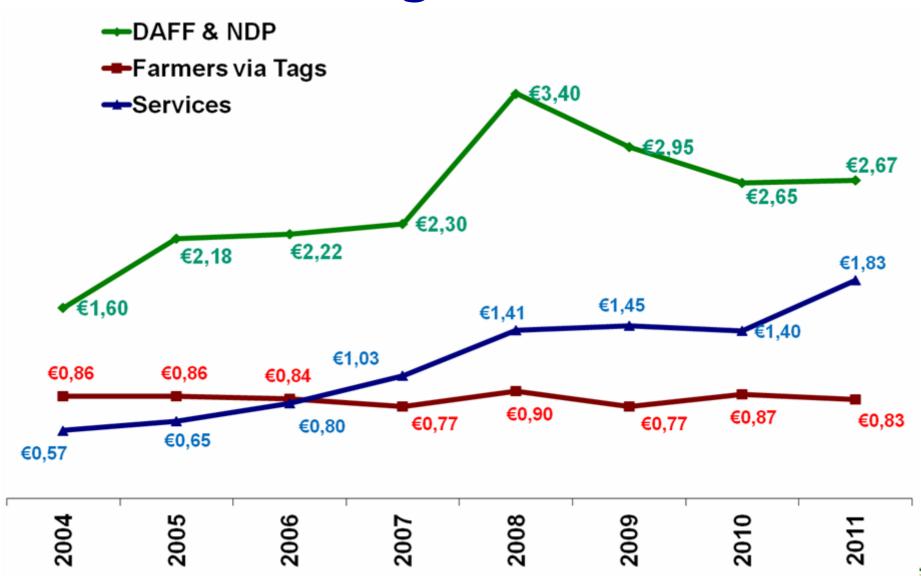

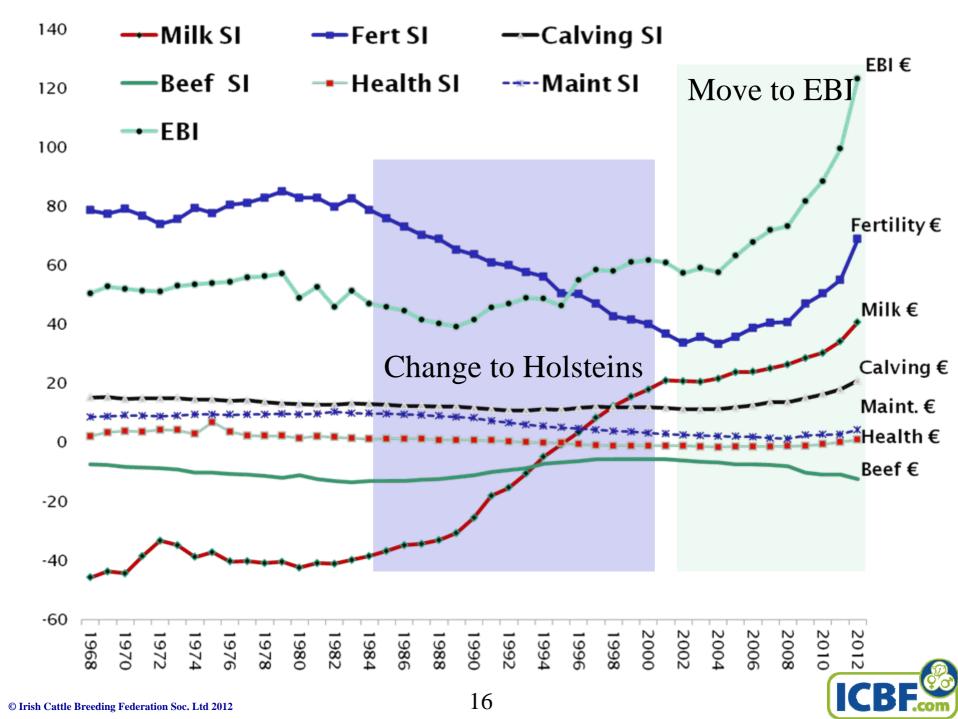

Funding

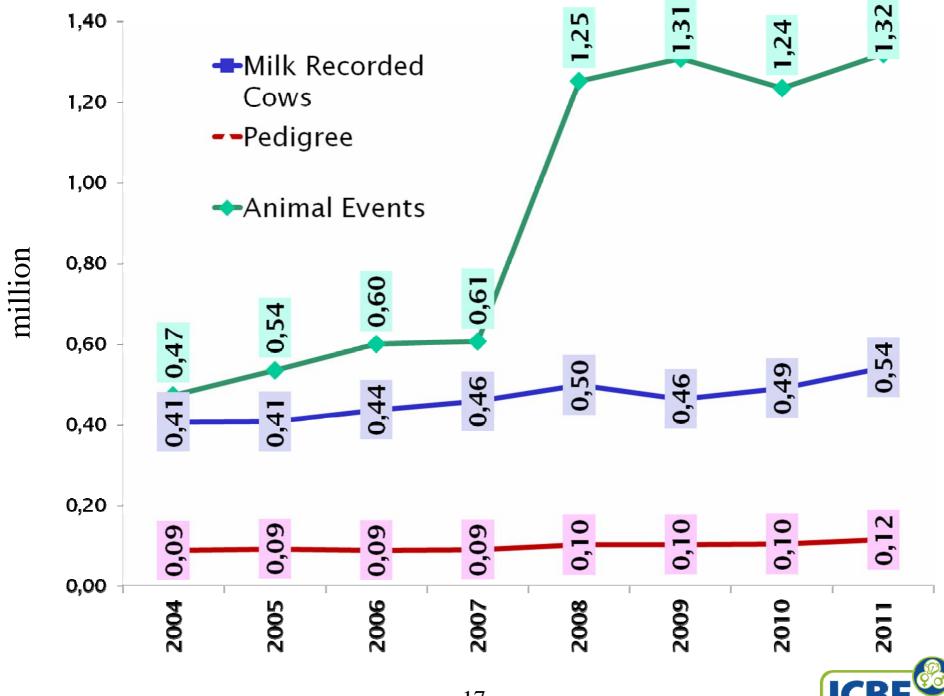

© Irish Cattle Breeding Federation

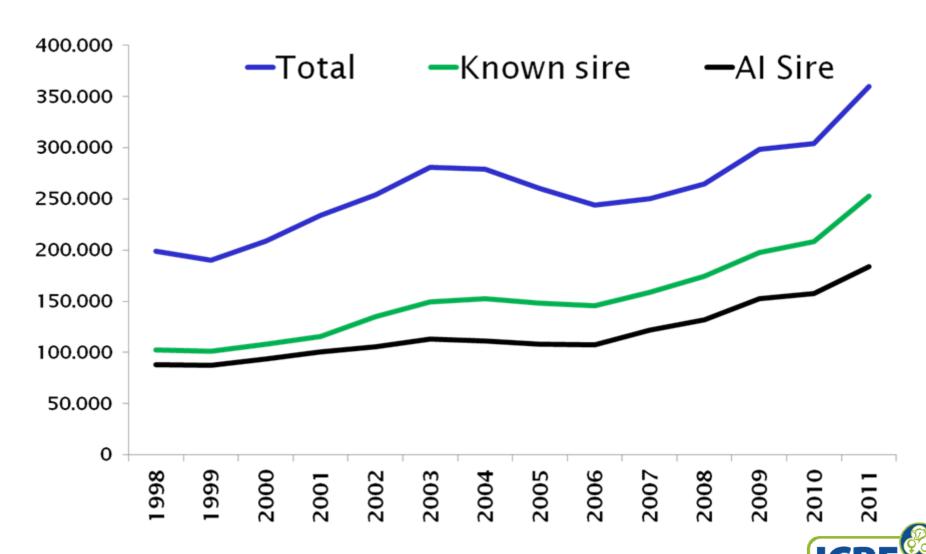

ICBF Funding Sources (€ million)

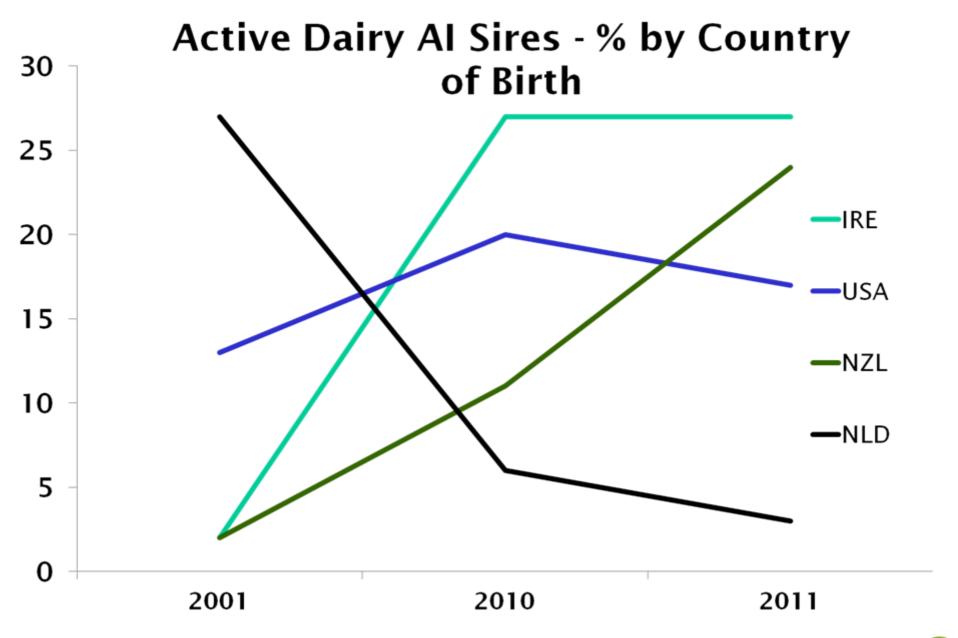

Impact on Al Sector – recorded dairy replacements by year of birth

Conclusions

- Ireland has established a new infrastructure for recording and genetic evaluations. In essence a partnership between service providers, farmers and Government.
- Funding has been provided by a mix of taxpayer, industry and service income.
- This has resulted in rapid innovation, and substantial short and long term benefits for farmers and service providers.
