

THE GLOBAL STANDARD
FOR LIVESTOCK DATA

Network. Guidelines. Certification.

Next steps for potential new members

Alexis Michenet - Simone Savoia (Interbull Centre)

Interbull Centre and Interbeef Services

Runs

- January and October routine run
- April (optional October) test run
- new country pilot runs

R&D support

- news traits
- specific Working Groups (Validation, VCE)
- International Genetic and Genomic Evaluations of Beef Cattle

Meetings organisation

- Interbeef Working Group and Technical Committee
- Interbeef Seminar

Interbull Centre and Interbeef Services

IDEA pedigree

- consolidated pedigree on Interbull IDs

IDEA performance

- raw performance + effects + model definition

Verify

- Check consistency of data
- Evolution of data on successive runs

Interbeef Country Pilot run

- Simple assumed genetic correlation with other countries
- Fast calendar defined with the country
- Cheap 1000€ per breed-trait combination

- Valuable Estimate the possible gain of international evaluation on EBV and reliabilities (non-publishable)

=> Opportunity to **try the Interbeef process**

"you try before you buy"

Requirements

National genetic parameters and model definition needed

Upload pedigree in Interbull Data Exchange Aera (IDEA) and check your international pedigrees

Build, upload and check performance file in IDEA

[With the support from Interbull Centre Team]

Join Interbeef community

- Participate to a **first test run**
 - estimation of inter-country genetic correlations
 - assessment of across-country connections
 - measure impact of inclusion of new country data
- Participate to a **routine run**
 - publish international EBV for better marketing:
identify the top bulls
 - increase accuracy
- Share **knowledge** with the community
